

# MLP of Cruise during SWT#25 (Oct 2019)

At SWT#25 (16-17 Oct 2019, ESTEC), no SWT decisions are needed, as LTP2 (= Jul-Dec 2020, the 6-month planning period starting 9months from now) had been planned already at Long Term Planning Level, together with LTP1.

The existing MLP for Cruise and LTP plans for May-Dec 2020 are shown as a reminder.

## MLP work done between SWT#24 and SWT#25

- The existing plan for the Cruise Phase has been upgraded by SOC to be compatible with the new observation definitions provided by the instrument teams (version 7.1), and simulation revised.
- An erroneous value in last PHI flush of RSCW1 was rectified.
- The upgraded MLP plan, in the version prior to SWT#25, is available in SOOP Kitchen: <https://solarorbiter.esac.esa.int/soopkitchen/#/planning/plan/MLP%20Feb%202020/969>
- *Note that the first 2 planning periods, LTP1 and LTP2, ranging from May to Dec 2020, have been planned in more detail (Long Term Planning level) by the SOWG during SOWG #14 - July 2019. The SOOP Kitchen links are available from the LTP pages LTP1 and LTP2.*

## Required planning during SWT#25

- **None**, only recap of the current plan and next steps in planning.
- All presentations of SWT#25 will be available from <http://www.cosmos.esa.int/web/solar-orbiter/> (follow the links 'Science Team"SWT Documents', file SolarOrbiter\_SWT-25\_Presentations.zip)

## Decisions made at meeting

- Minutes of the meeting: **To be added**

## SOOP Kitchen plan - status after SWT#25
