- [Richard Carr](#)
- [David Williams](#)
- [Andrew Walsh](#)
- [Pedro Osuna](#)
- Terje Fredvik (SPICE)
- Lynn Hutting (SoloHI)
- Emil Kraaikamp (EUI)
- Martin Kolleck (PHI)
- Maurizio
- Chandra
- Gethyn

Apologies

Xavier Bonnin

Agenda

- VM status - Engineering.
- VM product status.
- AOB

Discussion items

Item	Notes
VM Status - engineering.	<p>EUI:</p> <p>New VM pending - switch Centos Ubuntu 20.4. New test test.</p> <p>PHI:</p> <p>Log rotation now working.</p> <p>Converter pending.</p> <p>SoloHI:</p> <p>Lynn asked if we could go to LLVM 00.01.25 in Ops (in end, but soon afterwards, we deployed 00.01.28)</p> <p>Metis:</p> <p>(VM problem description - updated in next meeting)</p> <p>DW asked MP to send the lightcurves. He agreed to do this.</p> <p>SPICE:</p> <p>Something about a highest version number.... clearly demonstrates that the SPICE VM is the most mature 😊.</p> <p>No immediate plans for new VM.</p> <p>SWA:</p> <p>Chandra said there would be a new VM in a week or so. Mostly minor mods following an email from AW sometime before.</p>
VM product status	<p>AW mentioned that XB was proposing additional time conversion for SBN products.</p>

AoB	Emil asked if it would be a big deal is EUI produced compressed FITS files. Eventually emerged that this mostly wanted for science products and agreed that not a good idea for LL. Issue regarding science will be pursued separately. We agreed that the next Telecon will be on the 22nd of September (this later delayed to Oct 6th).
